REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The closest prior art of record, Kuwahara, U.S. Patent No. 6,202,072, discloses a method for *providing document conversion process* (see Abstract → creation of a structured (SGML) document from a plain text document), the method comprising:

converting an *unstructured document into an output presentation in the first display* (see Figs. 2, 3; see also col. 2, lines 21-29; → i.e. prototype into a plain text document), output presentation including a number of *displayable objects* and *respective decoration attributes* about each of the displayable objects (see Fig. 3 - item a; column 6 lines 17-27 → form with field elements including displayable objects and decorative attributes);

receiving a definition file including document type definitions (DTD) relating to the unstructured document (Fig. 1; column 5, lines 6-15 → receiving a document type definition (DTD) file that is correlated to the prototype file based upon the plain text file respectively); and

generating a *modified output presentation including association information of each one of the displayable objects being associated with one of the definitions in the definition file* (Figs. 2, 3, and 8; Abstract; col. 8, lines 60-67).

Kuwahara, in combination with Christiano, U.S. Patent No. 5,386,369, renders obvious a software dongle metering system that activates a counter having a numbering system and causes the counter to increment (see Abstract, col. 5, lines 42-57; see also Fig. 5).

Art Unit: 2176

And Kuwahara, in combination with Masonori, Japanese Patent No. 41 0116275, renders obvious a DTD viewer and style editor to open a DTD tree display window and style setting window (i.e. "first display") on a display part respectively and when a node is changed in the DTD tree display window, a node in the style setting window is updated associatively and vice versa (see English Abstract and Figs. 3 and 5) for the purpose of providing a document style editing device which can lighten the burden on a style editor when a document style is edited in a structured document.

However, the prior art of the record, taken in combination or alone, fail to explicitly teach, suggest, or render obvious

- *displaying in a second display next to the first display a DTD structure showing structures of the document elements and a tree structure showing the hierarchical relationships of the document elements based on a root element; and*
- *wherein the tree structure as well as a structure of the DTD are both shown in the second display next to the first display;*
- *a dongle to count the output of the software.*

Conclusion

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
